## Main points

### Introduction

This *Small Area Labour Markets* publication presents regional labour market data for each of the approximately 1,400 Statistical Local Areas (SLAs), the smallest available geographical units, on a State/Territory and Metropolitan/Non-metropolitan basis. For the States, estimates for the Capital City and the Balance of each State are also provided.

The estimates in Table 1 have been smoothed using a four-quarter average to minimise the variability inherent in the estimates at the SLA level. Unsmoothed estimates are included in Table 2.

A description of the methodology used to prepare the estimates in this publication is presented in the Explanatory Notes on page 52.

**Caution:** The estimates in Table 2 have not been adjusted to take account of seasonal or other variations and can therefore exhibit irregular movements. Accordingly, they should be used with caution. In addition, quarter-to-quarter comparisons may not be indicative of actual movements in the labour market. Year-on-year comparisons may therefore be more appropriate. Given the variability in the estimates in Table 2, users are strongly encouraged to refer to the data presented in Table 1.

### Labour market developments at the SLA level

The June quarter 2009 *Small Area Labour Markets* estimates show that unemployment has increased in the majority of areas.

- Around two thirds (66.3 per cent) of SLAs<sup>1</sup> recorded a rise in their unemployment rate over the year to the June quarter 2009. Large increases were recorded in Playford - Elizabeth in Adelaide (up from 16.9 per cent to 22.0 per cent), Eurobodalla in New South Wales (up from 5.6 per cent to 9.6 per cent) and Caboolture - Central in Queensland (up from 5.4 per cent to 8.4 per cent).
- In the June quarter 2009, 63.8 per cent of SLAs recorded an unemployment rate of less than 5 per cent, while 6.6 per cent of SLAs recorded an unemployment rate of 10 per cent or above.

### Next issue

It is anticipated that the September quarter 2009 issue of *Small Area Labour Markets* will be released in mid to late January 2010.

### Contact details

This report was prepared by the Labour Market Analysis Section within the Economic, Labour Market and Education Analysis Branch. For further information, please contact Rodney Trower on (02) 6121 7901 or Kellie Gavin on (02) 6121 3538 or E-mail: [salm@deewr.gov.au](mailto:salm@deewr.gov.au).

<sup>1</sup> Please note that only unemployment rates for SLAs without significant boundary changes (that occurred due to the move to the 2006 ASGC in the March quarter 2009) can be compared over the year.

\* Due to the small size of the labour force, particular care should be exercised when interpreting these estimates.

## Explanatory notes

### Structure of regional estimates in Tables 1 and 2

State/Territory data by **Statistical Local Area (SLA)** are presented in Tables 1 and 2. For the States, estimates for the Capital City and the Balance of each State are also presented.

There are about 1,400 SLAs in Australia. These are the smallest available geographical units in the Australian Bureau of Statistics' (ABS) standard geographical structure and consist of Local Government Areas (LGAs), parts thereof, or any unincorporated area.

In many cases, SLAs are named after their corresponding LGA. Where this occurs, the type of LGA is indicated in Tables 1 and 2 as follows: (A) = Area; (AC) = Aboriginal Councils; (B) = Boroughs; (C) = Cities; (CGC) = Community Government Council; (DC) = District Councils; (IC) = Island Councils; (M) = Municipalities; (RegC) = Regional Councils; (RC) = Rural Cities; (S) = Shires; and (T) = Towns.

### Methodology

The estimates in Tables 1 are quarterly averages derived from the monthly Labour Force Survey conducted by the ABS. The survey samples approximately 22,800 households across Australia and covers about 0.24 per cent of the population. More details about the methodology underpinning this survey are included in the ABS publication *Labour Force, Australia* (catalogue number 6202.0).

The estimates in Tables 1 and 2 are based on the Structure Preserving Estimation (SPREE) methodology which enables the generation of small area unemployment, unemployment rate and labour force estimates. The estimates in Table 2 are original, unadjusted estimates. Because of the level of disaggregation involved in producing the numbers in Table 2, they can exhibit considerable variability. To dampen this variability, and provide a more stable impression of labour market conditions at the SLA level, Table 1 presents the original data averaged over four quarters.

The estimates presented in Tables 1 and 2 are derived from three primary data sources:

1. Centrelink data on people in receipt of Newstart or Youth Allowance (Other), by postcode (not including people in receipt of the Community Development Employment Projects Participant Supplement);
2. ABS Labour Force Survey data at the ABS Labour Force Region level; and
3. 2006 Census of Population and Housing labour force data at the SLA level.

The purpose of SPREE is to produce small area labour market estimates that reflect the regional disparities of the Centrelink data, while being consistent with the ABS Labour Force Survey estimates.

*Unemployment estimates* are produced by apportioning the level of unemployment for a region, as published by the ABS, across each of the SLAs within that region in accordance with the distribution of Centrelink Newstart and Youth Allowance (Other) beneficiaries, taking into account ABS

unemployment estimates benchmarked at the metropolitan/non-metropolitan level.

*Labour force estimates* are produced by allocating the total labour force for each ABS Labour Force Region to the SLAs in that region according to weights derived from the 2006 Census.

Three assumptions are made in applying the SPREE methodology. First, it is assumed that recipients of unemployment benefits are uniformly distributed within the postcodes. Second, it is assumed that there have been no changes to postcode and SLA boundaries since the 2006 Census. Third, it is assumed that the proportional distribution of each ABS region's labour force between the SLAs within that region has remained stable since the 2006 Census.

Due to both the methodology used and the significantly higher variability for data disaggregated below the SLA level, it is not possible to derive reliable unemployment and unemployment rate estimates for particular groups (ie; males, females, youth) within an SLA.

### **Derivation of Employment Estimates**

The data in Tables 1 and 2 in this publication are synthetic estimates based on ABS and Centrelink unemployment numbers and labour force data from the 2006 Census. It is therefore inappropriate to derive employment estimates from these statistics. For more information contact Rodney Trower on (02) 6121 7901.

### **Other sources of Information**

This publication is available on the internet at:  
<http://www.workplace.gov.au/salm>

Small area labour market data are also available as data files. For details about the cost and contents of the data files, please refer to pages 53 and 54 of this publication.

The DEEWR *Australian Regional Labour Markets* publication is available free of charge upon request. The publication contains employment, unemployment, unemployment rate, participation rate and employment rate data for the 80 ABS labour force regions. It is published quarterly for the March, June, September and December quarters and is available approximately one month after the end of the reference quarter. The publication is available on the internet at: <http://www.workplace.gov.au/arlm> or by contacting the Labour Market Analysis Section on (02) 6121 3538.

**SPECIAL ORDERS OF SMALL AREA LABOUR MARKETS DATA**

Individual quarters of *Small Area Labour Markets* data for both Australia and individual States or Territories are available in spreadsheet form for most quarters back to the June quarter 1990. Note that data are not available for the September quarter 1996 through to the September quarter 1997 and therefore smoothed estimates are not available prior to the September quarter 1998. Please also note that a complete time series of data is not available for all SLAs due to boundary changes in the December quarter 1997, the December quarter 2002 and the December quarter 2007. Smoothed estimates for SLAs affected by the December quarter 2002 and the December quarter 2007 boundary changes are not available prior to the September quarter 2003 and the September quarter 2008, respectively.

A price chart is on page 55. If you are interested in making a special data order please indicate the quarters you require on the chart and return it, along with a signed copy of this form, to the mail or fax address below. The data will be forwarded to the address provided, together with an invoice or receipt as appropriate (see payment options). The information is supplied in both Excel and comma-separated values formats.

Please supply my data files:
